

Jadli Said

Data Scientist | ML Engineer

Casablanca-maroc | jadli.said00@gmail.com | +212 613 989 853 | saidjadli.com | github/saidjadli | linkedin.com/in/said-jadli

Profile

Engineering student in **Big Data, Data Science, and Artificial Intelligence**, with hands-on experience in designing Data, Machine Learning, and AI solutions. Skilled in **ETL pipelines, APIs, databases, LLMs, and intelligent application development**. **Rigorous, autonomous, and problem-solving oriented**, with a strong focus on building reliable and production-ready solutions.

Education

National School of Applied Sciences of Tétouan (ENSATE): Engineering cycle in Data Science, Big Data, and Artificial Intelligence. 2025 – present

National School of Applied Sciences of Tétouan (ENSATE): Integrated preparatory cycle (scientific preparatory classes). 2023 – 2025

Akensous High School, Essaouira: Baccalaureate in Physical Sciences, Highest Honors. 2021

Professional Experience

PFA Internship — Kifcom 360, Marrakech July – September 2026

- **Subject:** Designed and developed a multi-source **E-commerce Intelligence platform** integrating **Google Analytics 4, Meta Ads, and Shopify** to centralize and analyze business data.
- **Problem solved:** Automated data collection and analysis through **ETL pipelines and KPI dashboards** to provide unified insights on marketing performance, traffic, and e-commerce activities.
- **Stack:** Python, FastAPI, Next.js, PostgreSQL, SQLAlchemy, Docker, GA4 Data API, Meta Marketing API, Groq, LLM-based AI Insights, Automated Anomaly Detection.

Internship — NHANCITI Startup, Technopark Casablanca July – September 2025

- **Subject:** Developed an **LLM-powered chatbot** for analyzing and interpreting employee behavioral data and key performance indicators.
- **Problem solved:** Enabled natural language access to internal data using **RAG and NL2SQL approaches** to improve information retrieval and decision-making support.
- **Stack:** GPT-OSS-20B, LangChain, LangGraph, Python, FastAPI, Streamlit, MySQL, RAG, NL2SQL, Vector Embeddings.

Academic Projects

Satellite Image Super-Resolution using Deep Learning January 2026

- **Description:** Developed a satellite image super-resolution system ($\times 4$) by implementing and comparing CNN and GAN models, and designing an original multi-scale frequency-separation model.
- **Technologies used:** CNN-based super-resolution (SRCNN, SRResNet, EDSR), GAN (ESRGAN), PyTorch, evaluation metrics PSNR, SSIM, and LPIPS.

Automatic License Plate Recognition (LPR) May 2025

- **Description:** Built a system for automatic detection and recognition of license plates from images and videos with real-time annotated output.
- **Technologies used:** YOLO, Tesseract OCR, OpenCV.

Rainfall Prediction — Rain in Australia January 2025

- **Description:** Developed a machine learning model to predict rainfall using meteorological data (accuracy: 84%).
- **Technologies used:** Pandas and NumPy (data preprocessing and exploration), Random Forest, SVM, Naive Bayes, Logistic Regression, K-Means (classification and clustering).

Skills

Programming Languages: Python, C++, SQL, HTML, CSS.

Data Science & ML: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Spark, Hadoop, YOLO, OpenCV, OCR, Matplotlib, Seaborn.

Tools: Tableau, Power BI, AutoCAD, Git, LaTeX, MySQL, Merise, UML, Linux, Docker.

Soft Skills: Leadership, Teamwork, Problem Solving, Communication, Adaptability.

Languages: Arabic, English, French.

Extracurricular Activities

Rehabilitation project for shelters for abandoned and orphaned children April 2024

- **Led a social project:** organized a fundraising campaign, coordinated field activities, and managed the budget with a strong focus on transparency.
