

Jadli Said

Applied AI | ML Engineer

Casablanca-maroc | jadli.said00@gmail.com | +212 613 989 853 | saidjadli.com | github/saidjadli | linkedin.com/in/said-jadli

Profile

Final-year engineering student in **Big Data, Data Science and Artificial Intelligence**, specializing in the design of end-to-end **GenAI** and **Machine Learning** solutions. Hands-on experience with **Python, FastAPI, RAG, LLMs, APIs, databases, testing and Docker**, with a software engineering-oriented approach focused on reliability and production deployment of AI applications.

Education

National School of Applied Sciences of Tetouan (ENSATE): Engineering degree in Data Science, Big Data and Artificial Intelligence. — 2025 – Present

National School of Applied Sciences of Tetouan (ENSATE): Integrated preparatory cycle (scientific preparatory classes). — 2023 – 2025

Akensous High School, Essaouira: Baccalaureate in Physical Sciences, graduated with Highest Honors. — 2021

Professional Experience

Engineering Internship (PFA) — Kifcom 360, Marrakech — **July – September 2026**

- **Project:** Design and development of a **multi-source E-commerce Intelligence platform** integrating **Google Analytics 4, Meta Ads and Shopify** to centralize and analyze business data.
- **Problem solved:** Automation of data collection and analysis through **ETL pipelines and KPI dashboards** to provide a unified view of marketing performance, traffic and e-commerce activities.
- **Stack :** Python, FastAPI, Next.js, PostgreSQL, SQLAlchemy, Docker, GA4 API, Meta API, LLM APIs.

Internship — Startup NHANCITI, Technopark Casablanca — **July – September 2025**

- **Project:** Design of a **GenAI** application based on **LLMs**, enabling business users to query their data through a conversational interface.
- **Problem solved:** Facilitated access to internal data through a conversational interface using **RAG and NL2SQL** approaches for information retrieval and decision support.
- **Stack :** GPT-OSS-20B, LangChain, LangGraph, Python, FastAPI, Streamlit, MySQL, RAG, NL2SQL, Vector Embeddings.

Academic Projects

Enterprise Knowledge Assistant — RAG-based Generative AI Application — September 2026

- **Description:** Development and deployment of an AI assistant enabling employees to quickly access internal procedures and information through natural-language queries, with RAG, JWT authentication, conversational memory and source-grounded answers.
- **Stack :** Python, FastAPI, Streamlit, LangChain, ChromaDB, Redis, SQLite, Docker Compose, Groq (GPT-OSS-20B), HuggingFace Embeddings.

Satellite Image Super-Resolution using Deep Learning — January 2026

- **Description:** Development and comparison of satellite image super-resolution models ($\times 4$) based on **SRCNN, SRResNet, EDSR and ESRGAN**, including the design of a multi-scale frequency-separation model and evaluation using PSNR, SSIM and LPIPS.

Automatic License Plate Recognition (LPR) — May 2025

- **Description:** Development of a platform for automatic license plate detection and recognition from images and videos with real-time annotated display, using **YOLO, Tesseract OCR and OpenCV**.

Rainfall Prediction — Rain in Australia — January 2025

- **Description:** Development and comparison of machine learning models for rainfall prediction (**84 % accuracy**) using Random Forest, SVM, Naive Bayes, Logistic Regression and K-Means.

Skills

Languages : Python, C++, SQL, html, css.

Data Science & ML : Pandas, NumPy, Scikit-learn, TensorFlow, Pytorch, Spark, Hadoop, YOLO, OpenCV, OCR, Matplotlib, Seaborn.

Tools : Power BI, Git, LaTeX, MySQL, Merise, UML, Linux, Docker.

Soft Skills : Leadership, Teamwork, Problem Solving, Communication, Adaptability.

Languages : French, English, Arabic.

Extracurricular Activities

Rehabilitation Project for Homes Supporting Abandoned and Orphaned Children — April 2024

- **Social project leadership:** organization of a fundraising campaign, coordination of field activities and financial management with a strong emphasis on transparency
