Jadli Said

Stage PFE 2027 | Ingénieur IA - Machine Learning - GenAI

Maroc - Mobilité France | **jadli.said00@gmail.com** | **+212 613 989 853** | **linkedin.com/said-jadli** | **github/saidjadli** | **saidjadli.com**

Profile

Final-year engineering student at **ENSA** Tetouan, specializing in **Big Data, Data Science, and Artificial Intelligence**. Experience in developing **AI** and **Machine Learning** solutions, particularly **RAG/LLM**, data pipelines, and **Python/FastAPI** APIs. Seeking a **final-year internship** in France in 2027 to contribute to the development of reliable and operational AI solutions.

Education

National School of Applied Sciences of Tetouan (ENSATE) : Engineering Degree in Big Data, Data Science, and Artificial Intelligence — Integrated Preparatory Cycle and Engineering Cycle. **2023 – 2027 (expected)**

Akensous High School, Essaouira : High School Diploma in Physical Sciences, with Highest Honors. **2021**

Professional Experience

PFA Internship — Kifcom 360, Marrakech **July – September 2026**

- Design and development of a **multi-source e-commerce analytics** platform integrating Google Analytics 4, Meta Ads, and Shopify.
- Implementation of data collection and processing pipelines, backend APIs, and dashboards for monitoring marketing KPIs.
- Integration of AI-assisted analytics and anomaly detection features.
- **Technologies:** Python, FastAPI, Next.js, PostgreSQL, SQLAlchemy, Docker, GA4/Meta APIs, LLM API.

Internship — NHANCITI Startup, Technopark Casablanca **July – September 2025**

- Design and development of an LLM-based conversational assistant for querying internal data using natural language.
- Implementation of a **RAG** architecture for document retrieval and an **NL2SQL** module for database querying.
- Integration of language models into the backend and development of a conversational interface.
- **Technologies:** Python, FastAPI, LangChain, RAG, NL2SQL, MySQL, Streamlit, GPT-OSS-20B.

Academic Projects

Enterprise Knowledge Assistant – GenAI / RAG | Project **September 2026**

- Design and deployment on Render of a RAG-based AI assistant integrating vector search, source-cited responses, and conversational memory.
- Development of a FastAPI API with **JWT** authentication, memory management using **Redis**, and Docker Compose containerization.
- **Technologies:** Python, LangChain, ChromaDB, Streamlit, Groq (GPT-OSS-20B), Render.

Satellite Image Super-Resolution using Deep Learning | Project **January 2026**

- Development and comparison of 4 **satellite image super-resolution** ×4 architectures: SRCNN, SRResNet, EDSR, and ESRGAN.
- Design of a multi-scale frequency-separation approach and performance evaluation using PSNR, SSIM, and LPIPS.

Automatic License Plate Recognition (LPR) | Project **May 2025**

- Development of a license plate detection and recognition pipeline for images and videos, combining YOLO, OpenCV, and Tesseract OCR.

Skills

Programming Languages : Python, SQL.

Data Science & ML : Scikit-learn, PyTorch, TensorFlow, Pandas, NumPy, OpenCV, YOLO.

GenAI & LLM : RAG, LangChain, ChromaDB, Hugging Face, LLM APIs.

Tools & Deployment : Git, Docker, Docker Compose, Linux, Render, Streamlit, Power BI.

Backend & Data : FastAPI, PostgreSQL, MySQL, Redis, SQLAlchemy.

Languages : French (Operational / Professional), English (Good proficiency), Arabic (Native).

Extracurricular Activities

Rehabilitation Project for Homes for Abandoned and Orphaned Children **April 2024**

- **Social project leadership:** organization of a fundraising campaign, coordination of on-site activities, and financial management with a strong emphasis on transparency
